Erasmus+ Programme
of the European Union

CATALOGUE OF ORGANISATIONS, INSTITUTIONS AND PROFESSIONAL BODIES ON WORK SAFETY AND HEALTH, WITH SPECIAL ATTENTION TO THE CONSTRUCTION SECTOR

One of the goals and outputs of the ESTEEM Project is to create a Safety Training Knowledge Base (STKB). Its primary aim is to establish a state-of-the-art information hub, collating existing safety literature and work-related safety regulations, practices and training programmes across the EU, at organisational, national and transnational levels. In line with the ESTEEM priorities, there will be particular focus on safety training activities for low-skilled and migrant workers within safety-critical industries, such as construction.

This catalogue is an important component of the STKB. It aims to systematise relevant information about organisations and professional bodies concerned with safety and health in the EU (primarily located in the UK, Italy and Spain) and internationally, including those concerned with the construction industry and the employment of migrant and low-skilled workers. In doing so, the catalogue provides relevant information for training activities that may be helpful to identify elements of good practice, which can subsequently be drawn upon to develop safety training programmes. The Safety Training Knowledge Base forms a key milestone for the ESTEEM Project; it is the base from which the remaining Intellectual Outputs will stem.

This catalogue of organisations and bodies related to the field of safety and health presents information at the international, European or national level, offering links to the relevant websites and providing an overview of the key topics covered, including:

- Training courses and tools
- Training programmes
- Assessment of training activities, programmes, etc.

- Laws, regulations and norms.
- Indicators and indexes of accidents, injuries, fatalities, workers, etc.
- Certification of training related topics.
