Second Newsletter - ESTEEM Project

The ESTEEM project (European Safety Training and Evaluation supporting European Mobility) tries to respond to the problem of health and safety of workers in the construction industry, which remains paramount across Europe

What are we currently doing?

The first output of the ESTEEM project has been released!

Two transnational project meetings (in Bologna and Valencia) have been held since the last newsletter. Since the last newsletter we have made significant progress and below you can find more information about our progress.

The first output aimed to collect information about similarities and differences in Italy, Spain and the UK (and other countries) regarding training of workplace safety. Thanks to the leading role of the University of Valencia the output is now available in form of useful resources on:

- 1) Safety training programmes, courses, activities and tools, including assessment and certification, for both trainers and trainees.
- 2) Studies, reports and databases providing indexes and indicators relating to health and safety, accidents, injuries and fatalities.
- 3) Organisations, institutions and professional bodies associated with health and safety.
- 4) Laws, norms and regulations related to health and safety.

You can find all these useful resources here:

First Interactive Safety Training Workshop

On 27th November 2018, we held our first interactive workshop about safety training for low-skilled and migrant workers in the construction industry. It took place simultaneously in Sheffield, Bologna and Valencia!

During this event, fundamental knowledge about the ESTEEM project was shared with the public, and feedback gained on our ideas.

They were most productive events – many thanks to all involved!

Further details about each event can be found on our website:

<https://esteem.group.shef.ac.uk/esteem-events/first-interactive-workshop-november-2018/>
